

FIRE OFFICIAL'S DECLARATION OF HAZARDOUS ENVIRONMENTAL CONDITIONS AND FIREWORKS PROHIBITION

This declaration and determination is made this 25 day of June, 2026, in furtherance of the Town of Altamont's Resolution 2026-05, adopting fireworks and other ignition sources restrictions. This declaration is made pursuant to Utah Code Annotated § 15A-5-202.5(1)(b) and the rules adopted pursuant to the Utah Fireworks Act.

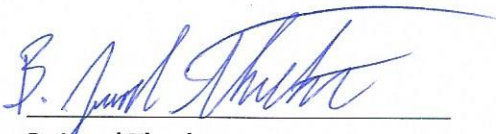

I, B. Jared Thacker, as Fire Chief and designated Fire Code Official for the Town of Altamont, Utah, have reviewed the current meteorological, fuel moisture, and environmental data for our region.

I have determined that existing hazardous environmental conditions exist such that 100% of the area within the municipal limits of the Town of Altamont currently constitutes an endangered dry grass-covered and brush-covered area. Due to these extreme conditions, there are no safe locations within the Town's limits to discharge fireworks or ignite other unregulated ignition sources.

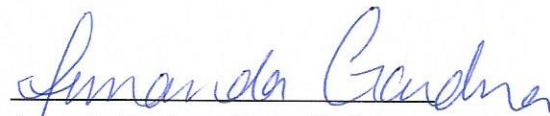

Therefore, in accordance with Utah Code § 15A-5-202.5(1)(b), I hereby issue this formal finding to the Town Council to support the immediate prohibition of fireworks and ignition sources as set forth in Resolution 2026-05.

This determination of hazardous conditions shall remain in effect until the Town Council and I find that environmental conditions have sufficiently improved to permit and warrant the lifting of these restrictions.

Dated this 25 day of June, 2026.

B. Jared Thacker
Fire Chief, Town of Altamont

ATTEST:

Amanda Gardner, Town Clerk
